- Easy for both senders and recipients to use, particularly on mobile devices.

- Cost-effective

Trustwave MailMarshal is the industry's most reliable and flexible email security solution with decades of leadership and recognition. MailMarshal's Trustwave Secure Email Encryption (TSEE) is designed to protect the information and documents you are sending through email at all times.

Sending confidential email securely is easier than ever with Trustwave Secure Email Encryption. It is a hosted service that provides effortless secure email delivery for confidential or sensitive information to any email recipient in the world. Recipients do not require any special software or training to receive secure messages – just an Internet connection and web browser.

Overview

This optional service allows Trustwave MailMarshal on-premise and cloud customers to send sensitive emails or confidential documents to any recipient in the world securely, without requiring the recipient to download or install any software. MailMarshal can be used to intelligently scan email for confidential information, based on policies you control, and then encrypt sensitive messages. When a message subject to your encryption policy is sent, it is automatically flagged for secure delivery by MailMarshal and is sent over a TLS connection to the Trustwave Secure Email Encryption service. Once Trustwave Secure Email Encryption has received the message, it automatically selects the best and least obtrusive technology to route the message securely to all recipients.

Key Benefits

Conveniently Secure Email to Anyone, Anywhere

Trustwave Secure Email Encryption allows you to easily send messages securely to any recipient in the world, without the need to establish a relationship prior to exchanging encrypted messages. Furthermore, it requires no additional software to use. New recipients navigate to the Trustwave Secure Email Encryption Portal to read their messages using a standard web browser.

### Fastest Secure Compose-and-Reply Functionality

Recipients can immediately read and reply to secure messages, using the custom webmail client on the Trustwave Secure Email Encryption Portal. For an added layer of security, you can choose to restrict your message recipients' replies to your own domains, ensuring privacy.

Custom Branding of Your Trustwave Secure Email Encryption Portal

Trustwave Secure Email Encryption's message portal can be modified to suit your corporate branding guidelines. Your corporate logo and messaging can be added to the site and notifications.

Automatically Optimized Message Delivery Security

Using a best method of delivery system, Trustwave Secure Email Encryption automatically uses the most secure available method to send email to each recipient. Emails sent between Trustwave Secure Email Encryption users will be sent using the secure TLS tunnels that have already been established. This optimizes security, convenience and speed. Emails sent to unknown recipients trigger a notification inviting the recipient to read their secure message via the Trustwave Secure Email Encryption web portal. As an added layer of convenience, Trustwave Secure Email Encryption gives you the ability to send secure messages to anyone in a world-wide directory comprised of over 14 million email users, including many in the healthcare, banking, insurance, and technology industries.
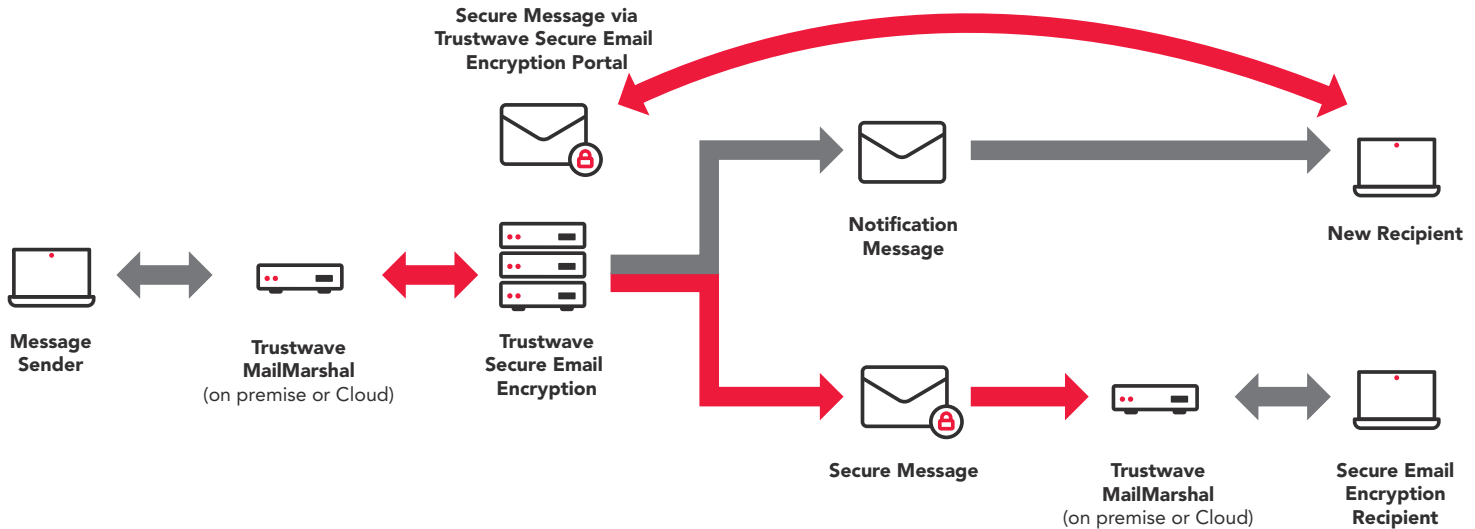

Support for Mobile Devices

Trustwave Secure Email Encryption can be used to read and send messages from iPhone, Android, Blackberry® and Windows Mobile® devices. With it, you can send confidential messages and be sure that the recipient can read and reply securely, no matter what they are using.

Reliable and Cost Effective

Trustwave Secure Email Encryption is easy to set up and requires no maintenance from your internal IT department. It's hosted in a datacenter with 99.9% availability guaranteed to our customers through our service level agreements (SLAs).

Solutions for All Types of Organizations
